

Aroma-oxygen Treatment

Aromatherapy is an incredible healing art with the ability to enhance wellbeing

I understand Aromatherapy is designed to help me relax, refresh, revive, and recharge my mind, spirit and body, based on the aromatic scent selected for my session

I understand that using oxygen at the IV Lounge by Injected Artistry is purely recreational

I understand this Aromatherapy session does not diagnose, prevent or treat any illness, disease, or any other physical or mental condition

I understand it is not a substitute for medical treatments. It is recommended that I see a qualified professional for any physical or mental condition that I may have. This recreational Aromatherapy session does not take the place of a medical evaluation and I have been advised to seek medical attention by a proper qualified healthcare professional for any healthcare concerns

I understand that Aromatherapy is not recommended for everyone. Individuals who should avoid Aromatherapy consist of the following conditions, such as: **asthma, emphysema, COPD, Cystic Fibrosis, cardiovascular conditions, cardiopulmonary conditions, vascular disorder, chronic medical conditions, those with sensitivity to scents or fragrances**

I have read the above information and I am ready to proceed with the Aromatherapy session

Please circle the fragrance you would like to have in your oxygen:

1) Rosemary Essential Oil

Used in Aromatherapy, Rosemary Essential Oil helps reduce stress levels and nervous tension, encourages alertness, clarity and insight, increases the retention of information by enhancing concentration, eliminate negative moods

2) Lemon Essential Oil

Used in Aromatherapy, Lemon Essential Oil uses it's rich antioxidant content with it's antimicrobial properties to help clear nasal passages, clear lung congestion, relieve cold and flu symptoms, fights bacteria and fungi, calms inflammation, depression, stress and boosts energy levels

It also has been used to fight bad breath and improve oral health and is also a popular remedy for nausea

3) Eucalyptus Essential Oil

Used in Aromatherapy, Eucalyptus Essential Oil is typically used for its medicinal properties. Helps clear your chest and breathe easier

4) Lavender Essential Oil

Used in Aromatherapy, Lavender Essential Oil has been known to have anti-anxiety, anti-inflammatory, anti-oxidant, and anti-microbial effects. These components interact with the brain and nervous system to reduce agitation, restlessness, and aggression

5) NONE

By signing this consent form, I hereby certify that I understand the above risks and contraindications associated with using Aroma-Oxygen. I agree that IV Lounge by Injected Artistry and all of its associates shall not be responsible for any complications I may encounter, during or after the use of the Aroma-Oxygen Treatment provided to me by IV Lounge by Injected Artistry.
