

THE ULTIMATE MASSAGE EXPERIENCE

Normatec leg compression system uses air compression to squeeze your legs. There are 7 levels of compression and pulse technology that deliver precise treatment to 5 overlapping zones by replicating the body's natural muscle pumps and one way valves of the legs.

This is advanced wellness and recovery for your muscles.

The main benefits are:

- 1) Increasing circulation
- 2) Revive muscles
- 3) Reduce swelling

Contraindications for use:

- Documented or Suspected Deep Vein Thrombosis (DVT)
- Serious arterial insufficiency
- Edema due to congestive heart failure
- Localized wound, infection or cellulitis
- Poor skin integrity, e.g., sores, necrosis, infection, wet and weeping, redness, active bleed, etc. ...

I have read the contraindications for use of the Normatec leg massagers. **initial:** (_____)

I do not have any of the contraindications of use. **initial:** (_____)

By signing this consent form, I hereby certify that I understand the above risks and contraindications associated with using the Normatec leg compression system. I agree that IV Lounge by Injected Artistry and all of its associates shall not be responsible for any complication or injuries sustained to me during or after the use of the Normatec leg compression system.
